

# How to use Yanhua ACDP vehicle info query function?

Magazine that you are interested in [Yanhua Mini ACDP](#) and wondering if it can program your key, but you only know your car model and year, then the newest ACDP query function will help confirm the IMMO system i.e BMW CAS1-CAS4+ or FEM/BDC are supported by Yanhua ACDP.

Besides, the user can enter the VIN code into the ACDP query function when they only know the car model and year (i.e BMW 5 series 2017)

Also, Yanhua ACDP can help the user inquire the ECU type when all keys lost and need to read out the engine ISN code.

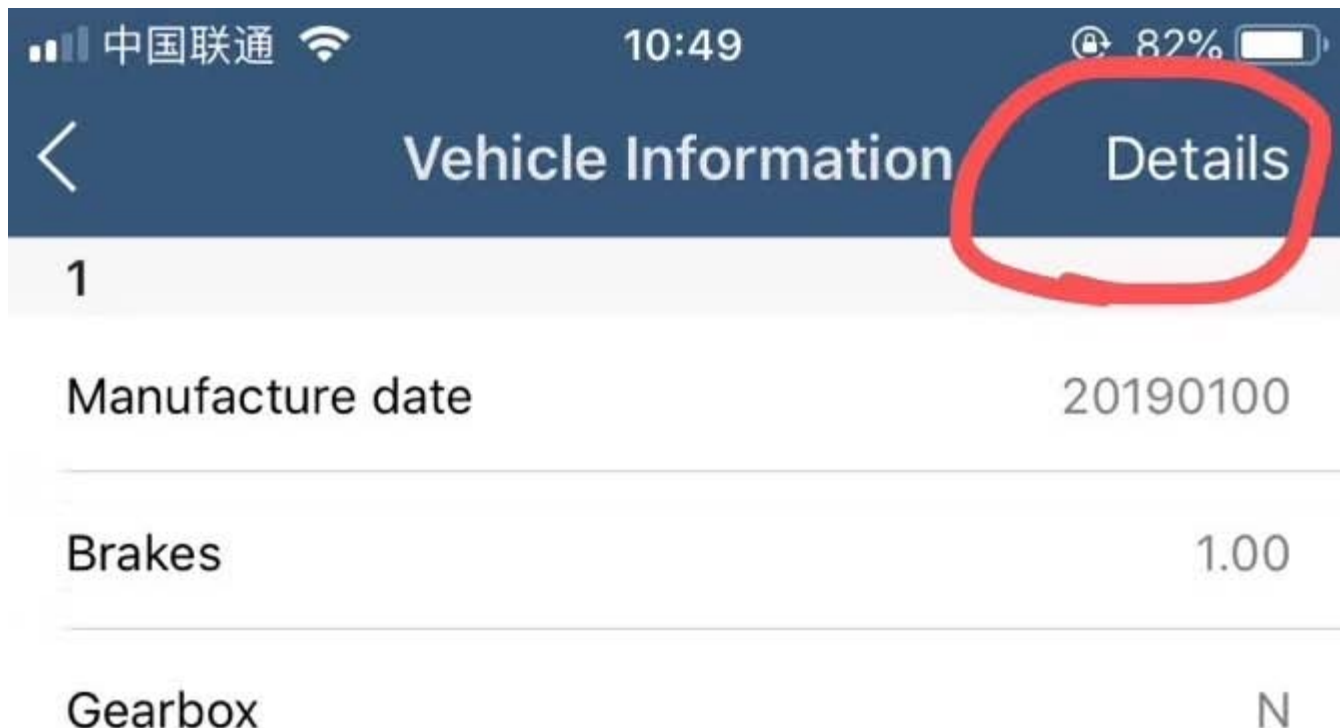

## Good to know:

Both IOS version and android version are confirmed working.

Please upgrade to the newest version.

## 1st part: enter VIN code to view the vehicle info in ACDP running with IOS

1. Choose "Details".

---

Engine B38A15M(4.25)

---

Transmission GA6F21AW(5.50)

---

Antifreeze(with AC)

---

Antifreeze 0.00

---

Final drive 0.00

---

Model 118i(2Y31)

---

Steering L

---

2. Choose "App store".

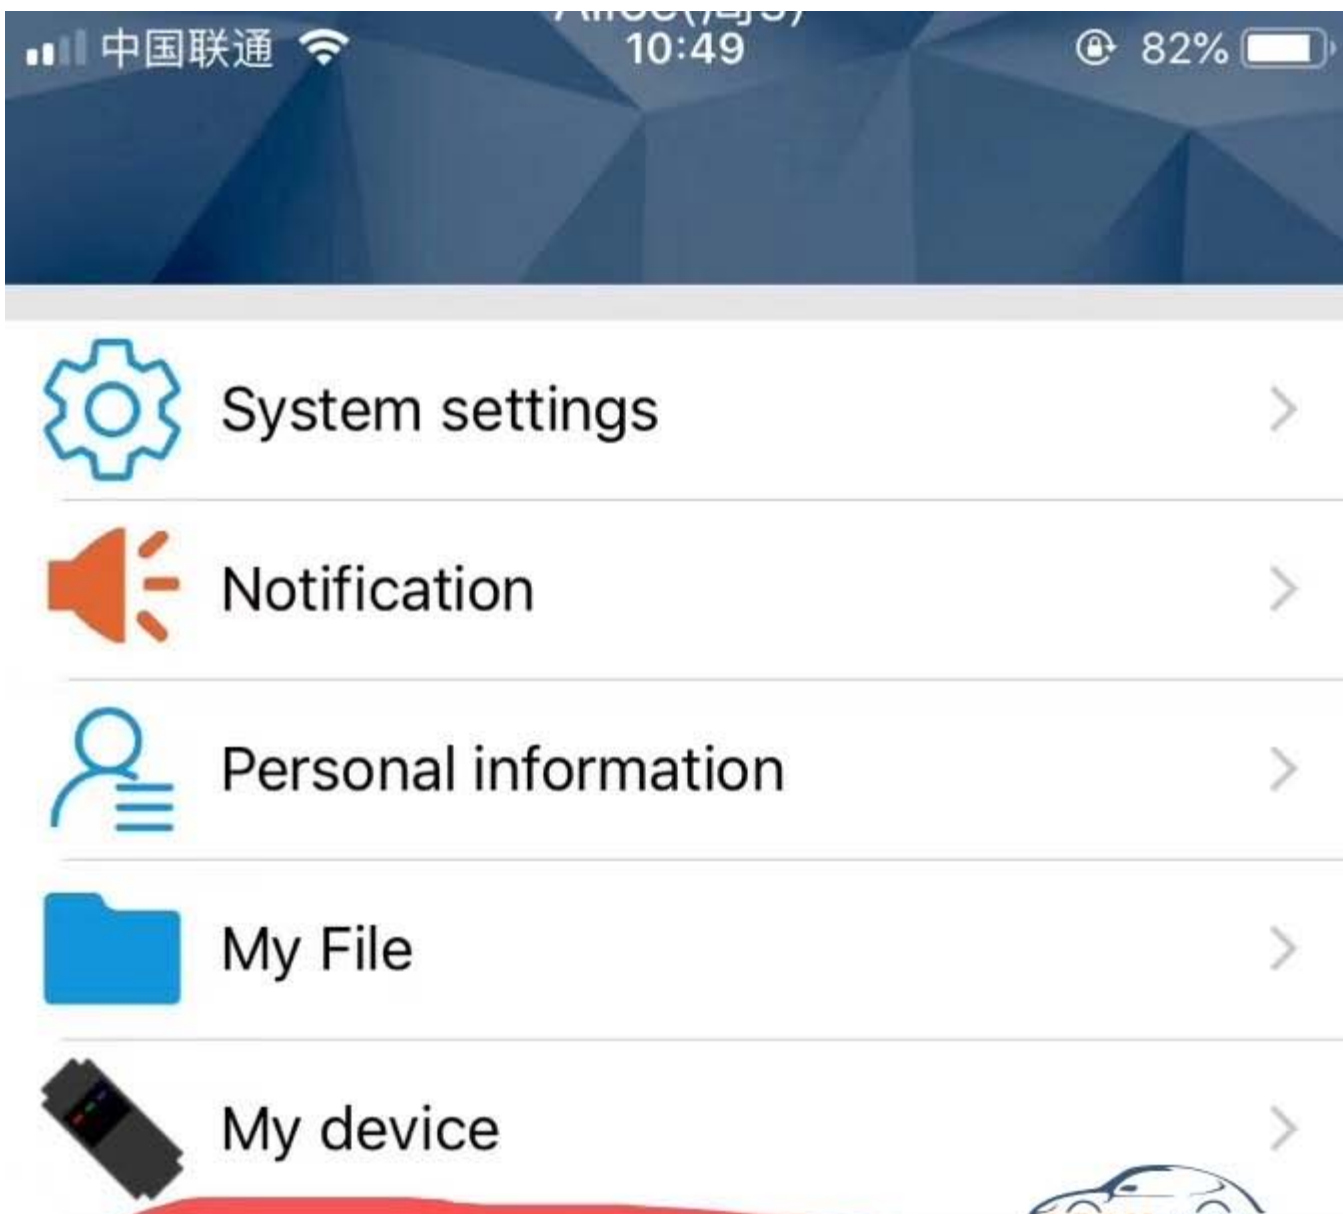

App Store

3. Vehicle information.

-  Vehicle Information >
-  Change Password >
-  Device authorization information >
-  No Disturb
